

Every couple is unique and I treat each wedding as a new experience. I document weddings with an open mind, immersing myself in the energy, building narrative around an initial spark. As a reportage style wedding photographer I take photographs unobtrusively behind the scenes letting the day unfold naturally. I take inspiration and utilize skills from many sources, including my art, landscape and commercial photography. Each source feeds into the other giving my wedding photographs a unique edge. Switched on and experienced, I capture atmospheres and moments that someone less even handed could miss. I pride myself on stylish photography that captures personality and charm.

My photographic style is also relaxed and I like to keep that throughout my work-flow. I don't have any complex package deals, extra add-ons or hidden charges... I keep it simple. I charge £899 for eight hours, £799 for six hours and £699 for four hours.

I provide:

Pre-wedding planning: A discussion where we will talk through the details of the day, I'm accommodating and keen to hear your ideas and inspiration.

Pre wedding exploration: I will scout all locations so we can get the most out of the surroundings. It's especially important if you are keen to have formal photographs as it will save time on the day.

The confidence of using a professional: I am switched on, experienced and I won't let you down. You can relax, enjoy the day and have 100% confidence that you will return from your honeymoon to stunning images.

Editing and post production of all images: I guarantee that all of my photographs will have the refinement that you expect.

DVD containing all photos as TIFF files: High quality images (35-45mb per file) that enable you to print large images such as canvasses and poster size prints to an exceptionally high standard. You will have the confidence to print your photographs as large as your imagination.

DVD containing all photos as JPEGs: High quality, accessible images that you can use for the majority of your printing needs, including a personalised wedding album or individual prints for friends and family.

DVD containing low resolution images: You can easily browse through your images on a computer or TV slideshow - perhaps you could upload your favourites to social media sites to share with friends online.

Travel: The price includes all my travel costs to and from venues.

... and of course an **Unlimited Usage Licence** so you have the freedom to printout as many images as often as you like, when you like!
